Citation for published version (APA):

Nouri-Nigjeh, E. (2011). *Electrochemistry in the mimicry of oxidative drug metabolism*. [Thesis fully internal (DIV)]. [s.n.].

Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Table of contents:

	Page
Chapter 1: General introduction	7
Chapter 2: Lidocaine oxidation by electrogenerated reactive oxygen species in the light of oxidative drug metabolism	43
Chapter 3: Electrochemical oxidation by square-wave potential pulses in the imitation of oxidative drug metabolism	65
Chapter 4: Electrochemical oxidation by square-wave potential pulses in the imitation of phenacetin to acetaminophen biotransformation	82
Chapter 5: Electrocatalytic activation of hydrogen peroxide on a platinum electrode in the imitation of oxidative drug metabolism by Cytochrome P450s	92
Chapter 6: Summary and future perspective	105
Samenvatting	111
Acknowledgement	117
List of Publications	118
